

CONTROL YOUR LIFE DON'T LET PRESCRIPTION DRUG ABUSE

- Mixing drugs can be lethal; this includes alcohol with pills.
- Caught without a prescription? May lead to felony charges and jail time.
- Underage drinking is illegal.
- Being convicted of a crime may limit your college & future career choices.
- It is illegal to sell or share ANY prescription drug.

Adderall™ Does it really make you smarter?

- The effects of amphetamines (Adderall) and methamphetamines are similar to cocaine.
- Adderall misuse can lead to heart attacks, palpitations, tremors, seizures, anxiety, increased blood pressure....

1988-2006

1 OxyContin
first- time users

Narcotic/Pain Pills:

- Narcotics are highly addictive (psychologically and physically) and effects are similar to heroin.
- Signs of Overdose- shallow & slow breathing, passing out, convulsions, coma.
- Alcohol & Narcotics both suppress; breathing mixing these or other drugs can be fatal.
